Product Information: Halogenated blowing agents

Dear Valued Customer,

The purpose of this communication is to inform you that in the following products lines:
STYRODUR®

no halogenated blowing agents are used as raw materials and
the following non-halogenated blowing agents are used as raw material:

•Pentane; CAS : 109-66-0
•Isopentane; 2-methylbutane; CAS : 78-78-4

For Notice: Many substances are ubiquitous. Observing all these substances is not part of our ongoing production control. Given the many factors that can affect the processing and application of our products, these data do not absolve processors from conducting their own investigations and tests. Moreover, these data do not imply any guarantee of certain properties or the suitability of the product for a specific purpose. It is the responsibility of the recipient of our products to ensure that any proprietary rights and existing laws and legislation are observed

This document was generated electronically and is valid without signature.

The document expires one year after the date of issue or upon any regulatory change occurring sooner. Please request a new confirmation if needed.

This information is believed to be accurate and refers to the laws, regulations and products at the date of issue. However, BACHL makes no express or implied representations or warranties with respect to the information contained herein. It is the sole responsibility of our customers to determine that their use of BACHL products is safe, lawful, and technically suitable for their applications. Because of possible changes in the laws and regulations, we cannot guarantee that the status of this product will remain unchanged.
